Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Specification

The examiner has not checked the specification to the extent necessary to determine the presence of **all** possible minor errors (grammatical, typographical and idiomatic). Cooperation of the applicant(s) is requested in correcting any errors of which applicant(s) may become aware of in the specification, in the claims and in any future amendment(s) that applicant(s) may file.

Applicant(s) is also requested to complete the status of any copending applications referred to in the specification by their Attorney Docket Number or Application Serial Number, **if any**.

The status of the parent application(s) and/or any other application(s) cross-referenced to this application, **if any**, should be updated in a timely manner.

The examiner queries the examples in the instant specification. Note example 1 refers to polyvinyl acetate of 50%. 50% what? This appears to be incomplete.

Abstract

The abstract is objected to as it should contain only one paragraph and should not refer to any figures. Correction is required.

Oath/Declaration

The declaration refers to a Hungarian application, **but does not formally claim priority thereto**. Neither is the priority document of record. Accordingly, applicant's effective filing date at this time is the filing date of the instant U.S. application.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are confusing in the failure to actually recite proper process steps. It is suggested that the claims actually recite "grinding", "mixing with cement, water, etc.", because "obtained by grinding and characterized by that have little meaning and are confusing as to exactly what is being mixed together.

The claims are indefinite in the terminology "soluble glass". Soluble in what?

Claim 2 lacks antecedent basis for the recitation of "the mixer" and "the known aggregates".

Claims 3 and 4 recite "is pressed to a". The "a" should be deleted.

Claims 5-7 recite "the mold walls". There is no antecedent basis for this recitation. Moreover, these limitations do not properly limit the method for making the concrete composition and therefore are accorded little weight. There is also no antecedent basis in the claims for "the constructed material".

Claims 12 and 13 recite "endless" which terminology is objectionable unless it refers to a circle. There is also no antecedent basis in these claims for the recitation of "the workpiece".

Claims 14-16 are confusing as written. The language "the form blocks are used as formwork blocks of different performance walls and floors". The examiner does not know what this terminology adds to the claim, what the scope of such language is, or whether or not such can actually be considered to further limit the method of making a cement composition.

The claims should be very carefully revised.

Allowable Subject Matter

This application contains allowable subject matter because the prior art of record, either alone or in combination, fails to anticipate or render obvious the herein claimed process for the production of a lightweight cement wherein PVA, glass, water, cement and ground plastic particles are mixed to produce the composition. If the hereinabove rejections are obviated, the application could be passed to issue.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

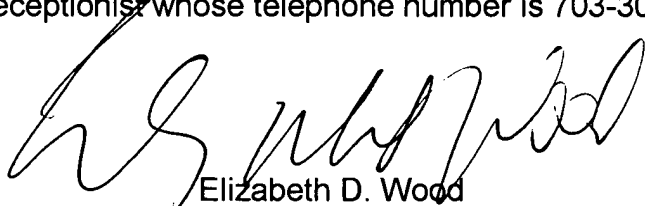

Applicants are advised that any evidence to be provided under 37 CFR 1.131 or 1.132 and any amendments to the claims and specification should be submitted prior to

final rejection to be considered timely. It is anticipated that the next office action will be a final rejection.
